

***Celithemis elisa* (Hagen)****Calico Pennant****10 May - 5 Oct****Common****29-34 mm (1.1-1.3 in.)****Small**

**MALE:** Eyes: chestnut. Face: red. Thorax: velvety brown hair; reddish w/ black markings. Abdomen: jet black w/ cherry red triangles on top. FW: small brown spot midway between tip/nodus, another pale spot beyond nodus, and third spot at tip. HW: dappled w/ large brown/amber mark basal, another smaller spot beyond nodus, and third spot at apex. Stigmas: bright red. Appendages: rufous above.

**FEMALE:** Similar to Male but yellow instead of red.

**JUVENILE:** Like F.

**Habitat:** Weedy ponds w/ emergent grass, bulrush beds in fresh, shallow water. Forages from tips of weeds in open fields often far from water.

**Reproduction:** Male is not territorial; waits for female near water. Mate perched on weed tips. Female oviposit in tandem dropping eggs into water, usually over emergent vegetation; female may continue alone for 2 minutes more.

**Notes:** Old name: Elisa's Pennant, Elisa Skimmer.
