PEDESTRIAN BRIDGE AT CENTENNIAL PARK CLOSED

"A Howard County Recreation and Parks' project to replace the pedestrian bridge located along the pathway loop in Centennial Park’s west area in Ellicott City, is expected to begin this spring. As the bridge site will be CLOSED until the installation of the new bridge (which is currently being engineered) is complete, detour signs (see map for route) will be in place to guide park visitors around the closure. Barrier walls have been installed along the northbound shoulder of Centennial Lane to separate and protect visitors from passing traffic, and to take visitors around the site so they may continue walking the lake loop. Weather permitting, the project is expected to be completed by late spring."
